

A laboratory behind glass

Dräger-Tubes®

Dräger

Technology for Life

Dräger-Tubes®

Dräger-Tubes® are used all over the world in many industries including oil and gas, petrochemical and chemical.

Dräger-Tubes® – a success story.

Dräger-Tubes® are an excellent example of a short-term gas measurement system – and not without good reason. For over eight decades, Dräger, a leading tube manufacturer, has developed its “laboratory behind glass”; and the more than 100 million tubes sold in the last ten years are testimony to the satisfaction of our customers.

Today, Dräger-Tubes® represent one of the classic forms of gas analysis. These versatile tubes make possible countless applications in industry, firefighting, disaster prevention, laboratory work, environmental protection and many other areas which require measurement results to be instantly available so that decisions can be made.

Especially in applications in which individual measurements or low measurement frequencies are sufficient, Dräger-Tubes® have certain advantages compared to electronic measurement equipment. They are comparatively inexpensive to purchase and very easy to use.

Dräger-Tubes® provide results immediately after measurement, so there is no need to send samples into a lab for analysis. There is also no need for calibration by the user – the calibration is shown in the form of a scale printed on the tube.

Currently, more than 220 short-term tubes are available for measuring up to 500 gases, and the number is growing year by year. New and more sensitive tubes are developed to meet changing environmental conditions, new legal regulations, falling limit values and special customer requirements. As far as new gases are concerned, the measurement system plays a pioneering role, and Dräger Safety is a trend-setter when it comes to developing new – even customer-specific – tubes.

The functional principle is amazingly simple

The Dräger-Tube, a sealed glass vial, contains on a solid carrier material a chemical reagent which reacts to a particular gas or vapor with a characteristic color change. To cause this reaction, a defined volume of ambient air is drawn through the tube using a Dräger-Tube® pump. Even small quantities of gas are sufficient, and the user can easily read and analyze the result using the scale marks printed on the tube.

A best seller with good reason.

Dräger-Tubes®

- deliver a fast and reliable measurement result
- are easy to use, even with safety gloves
- are a great option for spot measurements
- perform their measurements without any power supply
- require no calibration prior to measurement
- offer an impressive level of cost effectiveness

Dräger Voice: for more detailed information

You can find additional information about hazardous substances at

https://www.draeger.com/en-us_us/Substances

Our Dräger VOICE database contains information about more than 1,600 hazardous substances. The relevant Dräger Safety products are referenced for determination of respiratory and gas detection capabilities. Once you have registered – which is quick and free of charge – you can take advantage of this online service at any time, day or night.

Knowledge in compact form

The Dräger-Tubes®/MicroTubes handbook is designed to keep you up-to-date with the latest information and our newest technology. It provides a complete overview of all available tubes and systems, their respective applications, and accessories.

Take advantage of our know-how. The range of services we offer – technical applications-related advice, seminars, measurements and analysis, and production of customer-specific tubes – goes far beyond a mere product portfolio.

Our Dräger-Tube® pump: making measurements a breeze.

Together with the Dräger short-term tubes the Dräger accuro® pump completes the system. The Dräger-Tube® system is robust, highly accurate, very low-maintenance, ready for use quickly and easy to operate.

Dräger-Tube® pump accuro®

Handy, reliable and easy to operate define the Dräger accuro®. Because this one-hand pump works without a power supply, it can be used virtually anywhere including potentially explosive areas.* The sturdy and robust accuro® pump can be easily operated using only one hand and is therefore suitable for conducting measurements at places which are difficult to access. The end of each stroke is clearly indicated.

Dräger accuro®
Manual pump for use
with all Dräger short-
term tubes

Extension hose
Remote sampling
with Dräger-Tubes®

Prepared for many applications with the right accessories.

Intelligent accessories help you perform reliable measurements, even under many extreme conditions. With our proven solutions, you can be well prepared for many applications.

A perfect fit: The extension tube

For measurements at difficult to reach areas, such as ducts, shafts or tanks, extension hoses of up to 15 meters (49 feet) in length for the Dräger accuro® and up to 30 meters (98 feet) in length for the Dräger X-act® 5000 are available. The extension hose is fitted with a tube holder at the free end of the hose. This means that measurements are possible without flushing of the dead space volume of the hose.

Testing hot flue gases: The hot-air probe

The hot air probe allows you to measure extremely hot gases, e.g. in combustion plants. This probe should be used whenever the temperature range indicated in the instructions for use for the particular Dräger-Tube® is exceeded. The probe, which is connected by a rubber hose to the tube, cools the gas to temperatures below 50 °C (122 °F).

Cutting edge: The Dräger TO 7000

No bigger than a pencil sharpener, the Dräger TO 7000 opens the glass tip so cleanly that no jagged edges remain on the tube. Simply insert the tube, twist it, and you are ready for measurement. With the white measurement scale printed on the Dräger TO 7000, you have a light background for easy readability.

Warmth without power: The hot-pack holder

Freezing temperatures down to -20 °C (-4 °F) are no problem for the “tube warmer”, which requires no electrical power supply. The Dräger Hot-Pack Holder allows Dräger-Tubes® to be used even at certain ambient temperatures below the limits stated in the instructions for use. Extremely cost effective (the tube warmers can be used several hundred times) and easy to use, the Dräger Hot-Pack Holder is the ideal companion when working at below freezing temperatures.

systems**

**Measuring device
for oil, CO₂, CO
and H₂O**

Checking air quality with Dräger Aerotest® systems

Every day, fire brigade, healthcare and diving professionals rely on compressed air analysis from Dräger Safety. With more than 100 years of experience in this area, we provide measurement technology at a high level. Our Dräger Aerotest® family helps to promote safety during the measurement of compressed gases.

The Dräger Aerotest® system is used to check the quality of the air we breathe. Before compressed air can be used as breathing air, it must meet rigorous quality requirements such as those contained in the EN 12 021 standard, the U.S. Compressed Gas Association and the European Pharmacopoeia. Specially calibrated Dräger-Tubes®, Dräger oil impactor and the Dräger Aerotest® can be used to detect typical impurities in compressed breathing air quickly and reliably, e.g. CO, CO₂, humidity and oil. Besides breathing air, oxygen and carbon dioxide can also be analyzed very quickly for purity or for compliance with specific regulations. The Dräger Aerotest® Simultaneous Test allows parallel measurement of up to seven different contaminants, with results available in just five minutes. The Dräger Aerotest® Simultaneous Test is compact in design and can be connected to standard compressors, compressed air lines and cylinders using standard tools.

A wide selection of Aerotest® systems is available for checking compressed gases for purity. We have put the sets together for you in a handy case.

Dräger simultaneous test sets save valuable time in hazardous situations

Before you can take specific action to protect personnel and property, you need specific information about the hazard. Air contamination, e.g. from hazardous waste sites, fires, chemical or transport accidents, poses particular challenges. When it is important for you to track down multiple gas hazards as quickly as possible, the Dräger Simultaneous Test Sets are multi-gas detectors which help provide a fast basis for reliable decision-making – right on-site.

Dräger Simultaneous Test Sets comprise five Dräger-Tubes® arranged in parallel in a rubber sleeve. Via an adapter, the air to be tested is drawn through all the tubes simultaneously using the gas detector pump. The concentration of gases to be measured can be seen from markings on the tubes, which range from “non-hazardous” to “extremely hazardous”. We have developed three Simultaneous Test Sets for specialized applications such as fires or accidents involving hazardous goods transports: the Dräger Simultaneous Test Sets I and II for the measurement of inorganic fumes, and set III for the measurement of organic vapors. In addition, there are six other Dräger Simultaneous Test Sets available in conjunction with an adapter and the Dräger-Tube® pump for all kinds of different applications.

Dräger Simultaneous Test Set
Parallel measurement of five gases

All Dräger-Tubes® at a Glance

- 1) Tubes with 6-12 months shelf life
- 2) Tubes with two scales
- (x) Indicates less than 10 tests (5, 8 or 9 tests)

Water Vapor 3/a	3 – 60 lbs/MMcf	1.5	8103031
Xylene 10/a	10 – 400 ppm	1	6733161

Dräger Simultaneous Test Sets

	Standard Range of Measurement (20 °C (68 °F), 1,013 hPa)	Measurement Time (min.)	Order Code
Dräger Simultaneous Test Set I	Inorganic Gases for Sets I and II	40 s	8101735
Dräger Simultaneous Test Set II	Inorganic Gases for Sets I and II	40 s	8101736
Dräger Simultaneous Test Set III	Organic Vapors for Set III	40 s	8101770
Dräger Simultaneous Test Set Indicator Substances	VfdB 10/01	2	8103170
Dräger Clandestine Labtest-Set	Solvents	1	8103310
Simultaneous Test Set Fumigation I	Fumigants	3	8103410
Simultaneous Test Set Fumigation II	Fumigants	4	8103380
Adapter Dräger Simultaneous Test Set, consisting of cutting holder and adapter			6400090
Connector for use with Fumigation II, 8103380			8318110

Dräger Diffusion Tubes

Dräger-Tubes®	Standard Range of Measurement (20 °C (68 °F), 1,013 hPa)	Standard Range of Meas. for max. Period of Use(20° C (68 °F), 1,013 hPa)	Order Code
Holder for Dräger-Diffusion-Tubes (pack of 3)			6733014
Ammonia 20/a-D	20 – 1,500 ppm	2.5 – 200 ppm	8101301

Dräger-Tubes® Pumps and Systems and Accessories for Short-Term Measurement

	Order Code
Dräger-Tube® Pump accuro® with Tube opener Dräger TO 7000	6400000
Soft-Side accuro® Pump Kit consists of: Dräger-Tube® Pump accuro® with Tube Opener, spare parts set for Dräger accuro®, nylon carrying case	8317186
Hard-side accuro® Pump Kit, consists of: Dräger-Tube® Pump accuro® with Tube Opener, spare parts set for Dräger accuro®, rubber caps, rigid carrying case	4056443
Spare parts set Dräger accuro®	6400220

Dräger X-act® 5000 Basic Accessories

	Order Code
Power packs	
Rechargeable battery NiMH, T4	4523520
Charging accessories	
Wall-Wart Charger 100 – 240 VAC (worldwide)	4523545
Car charger 12 / 24 V	4523511
Accessories	
SO ₃ Filter replacement	8103525
Shoulder strap	4523565
Resistant tube (Dosage)	6527562
Hoses	
Extension hose, Dräger accuro® & Dräger X-act® 5000, 1 m, incl. adapter for Simultaneous Test Set	6400561
Extension hose, Dräger accuro® & Dräger X-act® 5000, 3 m, incl. adapter for tubes, adapter for hose in a carrying box	6400077
Extension hose, Dräger accuro® & Dräger X-act® 5000, 10 m, incl. adapter for tubes, adapter for hose	6400078
Extension hose, Dräger accuro® & Dräger X-act® 5000, 15 m, incl. adapter for tubes, adapter for hose	6400079
Extension hose, Dräger X-act® 5000, 30 m, incl. adapter for tubes, adapter for hose	6401175
Accessories	
Tube opener Dräger TO 7000	6401200
Tube hot pack holder for usage up to 20 °C, incl. adapter and 2 hot packs	8316130
Replacement hot packs (2 pieces)	8316139
Hot air probe for analyzing emissions of combusting plants	CH00213
Bar Probe 400 for examination of fumigants in containers	8317188

Dräger Aerotest

	Order Code
Dräger Aerotest® Simultan HP, complete incl. Dräger-Tubes®	6525990
Dräger Aerotest® Alpha, complete incl. Dräger-Tubes®	6527150
Dräger MultiTest med. Int., complete incl. Dräger-Tubes®	6520260
Dräger SimultanTest CO ₂ , complete incl. Dräger-Tubes®	6526170

Dräger-Tubes® for Application with Dräger Aerotest®

	Standard Range of Measurement (20 °C (68 °F), 1,013 hPa)	Order Code
Ammonia 2/a for use in CO ₂	0.6 – 9 ppm	6733231
Impactor for measurement of oil mist in compressed air	0.1 – 1.0 mg/m ³	8103560
Adapter for Dräger Oil Impactor	0.1 – 1.0 mg/m ³	8103557
Carbon dioxide 100/a-P	100 – 3,000 ppm	6728521
Carbon monoxide 5/a-P	5 – 150 ppm	6728511
Nitrous Fumes 0.2/a for use in MultiTest med. Int. / Aerotest® CO ₂	0.2 – 6 ppm 5 – 30 ppm	8103661
Oil 10/a-P	0.1 – 1 mg/m ³	6728371
Phosphine 0.1/c for use in Aerotest® CO ₂	0.1 – 4 ppm	8103711
Sulphur Dioxide 0.5/a for use in MultiTest med. Int.	1 – 25 ppm 0.25 – 1 ppm	6728491
Sulphur Dioxide 1/a for use in MultiTest med. Int. / Aerotest® CO ₂	0.5 – 2 ppm	CH31701
Hydrogen Sulphide 0.2/a for use in Aerotest® CO ₂	0.04 – 1 ppm	8101461
Hydrogen Sulphide 1/d for use in MultiTest med. Int.	1 – 20 ppm	8101831
Water Vapor 5/a-P	5 – 200 mg/m ³	6728531
Water Vapor 20/a-P	20 – 250 mg H ₂ O/m ³ 35 – 500 mg H ₂ O/m ³ 150 – 1500 mg H ₂ O/m ³	8103061

H₂O 20/a-P is supplied in the complete kits
