

New EASY PACK available!

Proven all-in-one system with new possibilities

NEW!

Vacuum Pump
V-300

Rotavapor®
R-300

Recirculating Chiller
F-305/F-308

This complete system solution gives users more scope for organising their daily routines in the laboratory.

That means that instead of watching over and monitoring the evaporation process, they are free to perform other tasks.

The system can be put together from a large diversity of possible configurations and individual components.

For example, you can choose between a manually operated or electrically powered lift for the rotary evaporator.

More information...
www.buchi.com/easy-pack

The package contains all components necessary to be able to start the distillation straight away:

- Rotavapor R-300 rotary evaporator with choice of manual or electric lift
- Interface I-300 or I-300 Pro as central control unit for the entire system
- Vacuum Pump V-300, which is ideally adapted for operation with the rotary evaporator
- All necessary tubing and accessories
- Safety shield for Heating Bath B-301/B-305
- Optional Recirculating Chiller with the desired cooling capacity

Example configuration

Order number

Rotavapor R-300, Vacuum Pump V-300 with Interface I-300 and Heating Bath B-301 with manual lift, coated glass assembly V (vertical cooler), safety shield for heating bath 11SR300111VS01

Rotavapor R-300, Vacuum Pump V-300 with Interface I-300 and Heating Bath B-305 with electric lift, coated glass assembly V (vertical cooler), safety shield for heating bath 11SR300251VS01

Rotavapor R-300, Vacuum Pump V-300 with Interface I-300 Pro and Heating Bath B-301 with manual lift, coated glass assembly V (vertical cooler), safety shield for heating bath 11SR300111VP01

Rotavapor R-300, Vacuum Pump V-300 with Interface I-300 and Heating Bath B-305 with electric lift, coated glass assembly V (vertical cooler), safety shield for heating bath 11SR300251VP01
