EUREKA'S SUPREME FEATURES

Airtight Cabinet

- * 100% in-house manufactured.
- * Best quality finish with anti-rust coating.

Calibrated Analog Hygrometer

- * Battery Free, continues monitoring during power outages.
- * Independently monitors %RH, assuring true moisture proof environment.

*Various hygrometer options available

Height Adjustable Shelves

Full range dehumidifying core unit options.

Special Features

1. AUTOMATIC DEHUMIDIFICATION

Plug and play. No water tanks to drain. No pipes to run. No consumable parts to replace.

2. ENERGY SAVING

Minimal electricity consumption. Continues dehumidifying and RH monitoring during blackouts.

3. AMBIENT TEMP / PRESSURE OPERATION

Stable drying in all temperatures. No condensation issue from temp. changes, No ΔT or pressure variation effects.

4. SAFE

Compressor free. No overheating issues.

5. DURABLE QUALITY

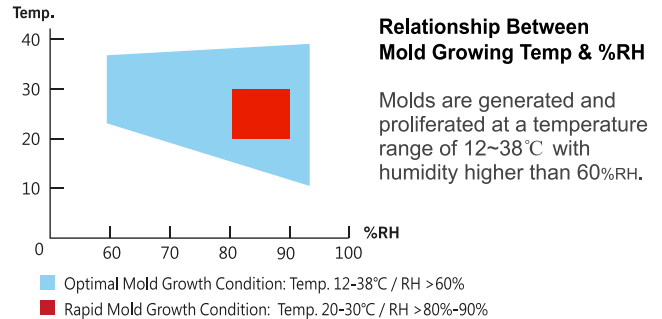

Low failure rate, easily repaired by users.

6. No. 1 TRUSTED BRAND

Over 20 years of experience. Trusted by millions worldwide.

BEWARE OF HUMIDITY HARM

SOLVING 4 MAJOR MOISTURE PROBLEMS

Mold begins to develop at 60%RH, Materials begins to oxidize and deteriorate at 35%RH

%RH is the relative humidity percentage in the air.

Mold / Fungus
Oxidation
Deterioration
Trace Moisture

>60%RH Environments: develop mold / fungus / foul odor, degrade, color fade, sound off-pitch and tarnish.

>40%RH Environments: cause oxidation, loss of luster, corrosion, mechanical aging, poor contact, distortion and other failures.

>20%RH Environments: cause deterioration, affecting food safety, manufacturing quality, accuracy of research / testing.

>5%RH Environments: cause increased defective rates affecting all moisture sensitive devices / components / materials and semi-finished products.
