Powerful and versatile

Sigma is one of the leading international manufacturers of laboratory centrifuges for biotechnology, pharmacy, medicine, environmental analysis and other industries. For over for 40 years, laboratories, institutes and companies from around the world rely on the premium quality of Sigma – made in Germany. The company stands for product innovation and the development of long-lasting, energy-efficient equipment That is particularly easy to use.

With its all-purpose design, the Sigma 6-16 centrifuge series is suitable for a wide variety of routine and research applications. Along with high throughput with fixed-angle and swing-out rotors, it easily achieves RCF values up to 25,419 x g. Laboratory technicians and scientists around the world appreciate its high versatility, modern user interface and outstanding reliability.

Particularly thanks to their ability to use fixed-angle, large-volume

rotors with high RCF, the centrifuges cover a distinctly broader spectrum of applications compared to competitive units. A unique selling point is the maximum capacity of up to 6 x 500 ml in the angle rotor at up to 17,207 x g.

In addition to the unrefrigerated Sigma 6-16S and the refrigerated Sigma 6-16KS, the 6-16HS is also available as a heatable model with a finely adjustable temperature range from 0 °C to +70 °C. It is specifically optimised for measuring the moisture content of crude oil and products made from crude oil (in accordance with ASTM standards). The portfolio is rounded off by the refrigerated, heatable 6-16KHS, which is particularly suitable for applications in which the viscosity of the samples needs to be reduced.

All-rounder for the toughest of requirements

Intuitive, powerful and safe

The powerful Sigma 6-16 centrifuge series is designed for research tasks as well as routine procedures in laboratory operations. It is widely used in microbiology and molecular biology, pharmaceuticals, genomics, bioproduction, cell culture labs, clinical diagnostics and transfusion facilities.

In addition to its impressive performance data, the series offers intuitive operation and sophisticated features. The patented one-knob Spincontrol S controller provides superior operating convenience, safety and versatility. Thanks to the intuitive user interface and

the clearly organised menu structure, operating parameters can be entered and adjusted quickly. The acceleration and braking curves (30 each) facilitate optimisation of separation runs and results. Routine procedures can be stored with user-defined names and quickly retrieved from the integrated process library. With automatic rotor identification, run time and speed monitoring, password-protected access to the controller and secure program storage, the centrifuges ensure uncompromising safety.

Sigma 6-16S

- Universal benchtop centrifuge
- Speed range up to 13,500 rpm
- Maximum capacity 4 x 1,000 ml
- User-friendly Spincontrol S controller
- Extra large TFT display
- Capacity for 60 programs
- Compact, space-saving unit
- Low noise level
- Automatic rotor identification
- Zero-maintenance induction motor
- Motorised lid lock
- Automatic imbalance monitoring
- Rotor life monitoring for high level of safety
- Easily cleaned stainless steel chamber
- Window in lid for external speed monitoring
- Manufactured according to the latest national and international standards Directives (e.g. EN 61010-2-020)

Sigma 6-16HS

All features of the Sigma 6-16S, plus:

- Heated, unrefrigerated centrifuge
- Temperature setting range: 0 °C to +70 °C
- Optimised for measuring the moisture content of crude oil and products made from crude oil (in accordance with ASTM standards)

Sigma 6-16KS

All features of the Sigma 6-16S, plus:

- Speed range up to 13,500 rpm
- High-performance cooling
- Temperature setting range: -20 °C to +40 °C
- Rapid Temp pre-cooling program
- Rotor cooling also possible at standstill

Options

- GMP version with water-cooled compressor and special housing
- Inert gas version with inert gas connection

Sigma 6-16KHS

All features of the Sigma 6-16KS, plus:

- Heatable refrigerated centrifuge
- Standstill cooling or heating
- Temperature setting range: -20 °C to +60 °C

Option

- Inert gas version with inert gas connection

Rotors and accessories

Large selection and a multitude of applications

The compact Sigma 6-16 series is available with numerous swing-out and fixed-angle rotors, buckets and adapters. A total of 12 fixed-angle rotors and 6 swing-out rotors are available. The extensive range of accessories can accommodate tubes from 0.2 ml to 1,000 ml in size as well as blood pouches, petroleum tubes or micro titration and deep-well plates.

The swing-out rotors can hold up to 4 litre (4 x 1,000 ml) or (for example) up to 96 conical 15 ml tubes or 40 conical 50 ml tubes. In many cases the configurations achieve best-in-class RCF for this

centrifuge segment. The 6 x 500 ml rotor with a maximum RCF of 17,207 x g and the 6 x 250 ml fixed-angle rotor with a maximum RCF of over 20,300 x g are unique selling points in the fixed-angle rotor sector.

As a special feature, Sigma can produce custom accessories upon request. The rotors and accessories are made from certified high-grade materials to withstand the most severe stresses.

Cleanroom

Robust and resistant

An extremely resistant cleanroom coating is available from Sigma for all aluminium buckets and rotors. This coating provides reliable corrosion protection for accessories, especially where aggressive chemicals are used. The cleanroom coating can even withstand exposure to

sodium hydroxide and hydrochloric acid. The surfaces are also food-grade (FDA certified) and can easily be cleaned without residues.

Cleanroom coating

Available for all accessories

Material properties

Guideline for optimal tube selection

Due to the many factors that influence material properties, this overview is only intended as a general recommendation. There is no guarantee of the stated properties. Users should therefore carefully

test materials for suitability under specific application conditions. Tubes should be discarded as soon as they show any sign of material fatigue.

Spincontrol S controller

Intuitive operation and many options

The patented one-knob Spincontrol S controller sets standards in control technology for laboratory centrifuges. All parameters, such as speed, RCF or temperature, are set using the multifunction knob and can even be altered during operation. Illuminated buttons for starting, stopping and lid opening facilitate access to these functions.

Along with manual settings, previously entered programs can be selected using a shortcut. These programs can be assigned alphanumeric names to enhance process reliability and simplify operation. An extremely practical feature is the large program status display, visible from a distance, with a progress bar. All setpoint and actual values are constantly shown on the clearly organised display.

The countless features leave nothing to be desired: timer after setpoint speed reached, capacity for 60 programs, password protection against unintentional alteration of run parameters, rotor cycle counter. Those are just a few of the highlights that make the Spincontrol S controller a highly versatile system that will help you to meet the laboratory requirements of the future.

This premium controller from Sigma supports internal quality management functions as well as external communication with a laboratory information management system (LIMS). That way the Spincontrol S supports traceable professional reporting.

Premium quality

Made in Germany

The Sigma 6-16 series meets the highest technical requirements and laboratory standards. Manufactured at the Osterode site in Germany, they are high-performance, durable, energy-efficient products of high quality, and meet the latest safety, emissions and environmental criteria.

Sigma guarantees the availability of spare parts and wearing parts for at least 10 years. Furthermore, you benefit from our extensive services portfolio, including commissioning, maintenance, device calibration and more.

Our qualified service technicians are ready to provide professional maintenance and repair as well as loaner devices if necessary. All support services are designed to maintain reliability and optimise system availability. With our three service locations (South, West and North/East), we can provide comprehensive support and short response times.

Centrifuge tables

Sigma centrifuge tables are available in six different sizes. Matched to the corresponding centrifuge dimensions, they combine convenient work height with an optimally calculated footprint. The tables are made of coated sheet steel and are equipped with two doors, an ample storage compartment and a convenient pull-out shelf. Lockable castors allow the centrifuge tables to be easily moved and positioned in the laboratory.
