Enhancing every step of your sample journey

Your Sample. Our Passion.

The success and validity of all your work, all your expertise and effort you put in every day, the time you invest, the value to the whole of science, lies in tiny, fragile samples. Just one failure, whether it is a lost or destroyed sample, has a huge impact on the quality and success of your research.

Your samples are precious, some are invaluable, and they can make or break your next discovery. Therefore, **sample handling is key**. From the very

first sample to the last. From cell culturing, through preparation and final analysis. It is our passion to support you with our services and expertise, as well as sustainable products and digital solutions for reliable work with your samples. We simply want to create optimal conditions for your research and give you the assurance that your samples are in good hands at every step of the workflow.

Eppendorf Research® plus, 6-Pack with Pipette Carousel 2

A new Research® plus bundle with great value to get you started.
This bundle consists of :-

- > 1 unit of Research® plus 1-channel, variable 0.1-2.5 µL with epT.I.P.S® Box 2.0
- > 1 unit of Research® plus 1-channel, variable 0.5-10 µL with epT.I.P.S® Box 2.0
- > 1 unit of Research® plus 1-channel, variable 2-20 µL (yellow) with epT.I.P.S® Box 2.0
- > 1 unit of Research® plus 1-channel, variable 10-100 µL with epT.I.P.S® Box 2.0
- > 1 unit of Research® plus 1-channel, variable 20-200 µL with epT.I.P.S® Box 2.0
- > 1 unit of Research® plus 1-channel, variable 100-1000 µL with epT.I.P.S® Box 2.0
- > Pipette carousel 2
- > 1 unit of Eppendorf Pipette Pen

Eppendorf Pipette Trade-In Program

Do you have any pipettes that are no longer in use due to various reasons and are taking up space in your lab? Why not trade them in to get new Eppendorf pipettes! We offer you a special price for every unit that you trade-in. We accept all brands and condition.

- > Old and worn pipettes
- > No longer serviceable
- > Non-available spare parts
- > Not calibratable
- > Broken pipettes

Get a special trade-in price from now until the 15th December 2023. Get a quote for this promo or scan here

* Promotion is valid for any volume ranges as stated below

* Promotion excludes the epT.I.P.S® Box 2.0

Description	Order no.	Description	Order no.
Research® plus 1-channel, variable 0.1-2.5µL d-gray	3123000217	Research® plus 1-channel, variable 0.5-5mL purple	3123000276
Research® plus 1-channel, variable 0.5-10uL m-gray	3123000225	Research® plus 1-channel, variable 1-10mL turquoise	3123000284

Control up to 30 Electronic Pipettes!

Yes, you can do that with our Pipette Manager now. The NEW Pipette Manager further improves and redefines how you use our range of Xplorer® electronic pipettes.

Finish your daily tasks faster

Fast but accurate and consistent

Everybody is up to speed

- > Standalone plug'n'play system for fuss-free operation
- > Enter/change pipetting settings quickly and finish long and complex protocols faster
- > Choose or create your own liquid types for improved accuracy in your pipetting volumes
- > Share pipette sets (up to 30 pipettes) and liquid type settings
- > Compatible with iPad and Android tablets

You just need to upgrade the Xplorer® pipettes with the Xplorer® Connect WIFI module to start working with the Pipette Manager.

Unleash Your Potential

Meet the new epMotion® automated liquid handler

The new generation of epMotion® automated liquid handlers have been designed to enhance the user experience while maintaining high levels of performance.

Available in two sizes and six configurations to suit your research needs.

- > Sleek design and compact size to fit any lab space
- > Unparalleled pipetting accuracy and precision in liquid handling
- > Intuitive software ensuring ease of use for the end-user
- > Optimised protocols cater to specific application needs
- > Extended walk-away capabilities to reduce hands-on time

The new epMotion is an excellent addition to any lab.

Use your smartphone camera to scan the QR code and connect with your Eppendorf Territory Manager

There are more reasons to use the Eppendorf Conical Tube 25 mL now

The Conical Tube 25 mL is now available in DNA LoBind, Protein LoBind and Amber variants. With the LoBind variants, you can minimize loss of nucleic acids (DNA LoBind) and protein/exosomes (Protein LoBind) during sample processing or sample storage. For the amber variants, light sensitive samples are protected by our see-through amber material. This visibility allows better accuracy in pipetting of this sample type because you can easily see where the level of the sample is inside the tube.

The Conical Tube 25 mL is a better option to using the 15 mL conical tube

- > More air space for growing 10 to 15 mL cultures optimally
- > 1.8X larger in diameter for thorough mixing results with reagents and culture growth
- > Minimize risks of cross contamination with pipettes due to 1.8X bigger in tube opening
- > SnapTec® cap variants allows one handed operation for better ergonomics
- > Screw cap/Snaptec® cap guarantees lid tightness due to precise manufacturing
- > 20% shorter in length for better ergonomics and save storage space
- > Can use the existing Conical Tube 50 mL rotor with or without an adapter*

*for centrifugation speed of less than 5000 x g the tube can be centrifuged without an adapter

To celebrate the 60th Anniversary of the Eppendorf Tubes, you get a special price for all Conical Tube 25 mL including the newly launched LoBind and Amber variants.

* Promotion ends 15th December 2023

Receive a limited edition 60th Anniversary double walled cup when you purchase any 3 packs of 25mL Conical Tubes. [Fill up the inquiry form](#) to get a quote from us or scan here

CellXpert® C170i CO₂ Incubator – Best value for your investment

Do you know that running costs of a CO₂ Incubator can easily exceed its purchase price over time?

Regular replacement of the fan-assisted HEPA filters or UV lamp, loss of sample capacity due to the limited chamber size, high gas consumption are among the running costs that add up to the overall cost of ownership. In addition, cross contamination in the chamber causes sample loss and repetition of experiments. This would add up to significant running cost.

The CellXpert® C170i CO₂ Incubator offers the best value for investment and providing more value add:

- > Fan-less and seamless chamber design – provide 25% more of usable space and more efficient to clean
- > High temperature homogeneity – produces a highly homogenous temperature distribution throughout the chamber and hence reproducible cell cultivation results
- > Segmented split inner doors – help to save less gas consumption, facilitate faster temperature/gas recovery to set points and reduce cross contamination
- > Filter-less design – yet the High Temperature Disinfection (HTD) technology is available for effective contamination prevention
- > Low gas consumption
- > Easily disassemble inner chamber parts for cleaning/decontamination exercise.

New Brunswick S41i CO₂ Incubator Shaker - The Best of Both Worlds

Do you require static and shaking incubation for your cell culture work?

Meet the S41i CO₂ Incubator that allows you to do both static and shaking incubation within the same footprint!

- > The robust Innova triple eccentric drive shaking technology ensures highly homogenous shaking with minimal vibration to your cells
- > Stackable up to 2 units to enhance sample capacity within the same footprint
- > Efficient decontamination with High Temperature Disinfection (4 hours at 120 °C) and seamless chamber for effective cleaning
- > Touch screen interface for ergonomic operation

Wait no more by seizing the promotion that we are running at the moment for the New Brunswick S41i CO₂ Incubator Shakers!

Ensure top performance spin after spin
www.eppendorf.com/centrifuge-service

Your reliable clinical partner-
Centrifuge 5702
at a discounted price

Your workhorse
Centrifuge 5810 R
on promotion
now!

Universally versatile for every sample

Centrifuge 5910 Ri offers you all the benefits of a 4 L device in a smaller footprint

- Perfect for the lab that needs multiple separation solutions from one centrifuge.

Spin more for less with our unique universal rotor and adapter concept

- > Adapter 1: Eppendorf Tubes® 5.0 mL, 15 mL conical tubes and DWP
- > Adapter 2: 25/50 mL conical tubes and MTP
- > Adapter 3: 25/50 mL conical tubes, 250 mL bottles and MTP

Your benefits:

- > **Save Time:** No need to exchange buckets or adapters means more comfort when using tubes and plates
- > **Save Costs:** No need to buy separate adapters for all different vessel types or buckets (e.g. one for tubes and one for plates)
- > **Save Space:** No need to store different buckets or adapters – save valuable lab space

Buy selected Centrifuge 5910 Ri bundles with promotional price now!

The latest addition to our portfolio - high-speed floorstanding and ultracentrifuge

Eppendorf is now able to offer you a broader range of centrifuges with the high-speed floorstanding and ultracentrifuges. We now offer solutions for broader application needs of up to 150,000 rpm (1,050,000 x g) and capacity up to 6 L.

High-Speed Centrifuges

- > Wide range of rotor types with max. speeds of up to 110,000 x g
- > Increase efficiency and throughput for volumes from mL up to 6 L
- > Save processing time of up to 32% with our innovative 1.5 L triangular bottles
- > Ensure highest level of user safety with automatic rotor recognition and self-locking rotor system

Ultracentrifuges

- > Flexible rotor options with max. speeds of up to 1,050,000 x g
- > Automatic Rotor Life Management System (RLM) digitally tracks run times, so no need for manual logs with Centrifuge CP-NX series
- > Switch easily between different applications with automatic rotor recognition system
- > Limit the risk of equipment damage with tool-free self-locking rotor system

Be Confident About Your Sample Safety

Get connected to VisioNize® Lab Suite

What is the cost of leaving your freezer door open?

Monitor your freezers from anywhere receiving real-time notifications of any temperature fluctuations or power failures.

VisioNize Lab Suite offers everything you need to effectively manage your lab and ensure the safety of your samples.

Real-Time Monitoring

Monitor your entire freezer fleet and track device status, parameters (e.g. temperature), and history from anywhere

Task Management

Plan and assign device-related maintenance tasks to ensure optimal device performance

Device Connectivity

Connect and monitor all your freezers including 3rd party with VisioNize sense monitoring kit*

Easy Data Access

Export device and event data, as well as logged user interactions

Alarm Management

Track all alarm acknowledgements with time-stamped data logs

Instant Notifications

Receive alarm and event notifications and quickly address any issues

Response-Based Alarm Escalation*

Define escalation schemes to individual or multiple recipient groups based on lab presence.

Protecting your Samples

Ensure the safety of your samples 24/7

* Note: Currently available in Thailand and Malaysia and soon in Singapore

Secure your samples with VisioNize Lab Suite for free!

Discover more on what VisioNize Lab Suite can offer by clicking the link below:

Supporting your daily needs

Choose a Mastercycler® nexus gradient

For reliable and efficient PCR performance day in and day out, the Mastercycler® nexus gradient PCR cycle is the ideal choice.

Your benefits:

- > Universal block for ultimate flexibility
- > Advanced gradient capabilities
- > Versatile flexlid® to fit your chosen consumables.

Contact your local Eppendorf Territory Manager for promotion details. Promotion is valid until 30th June 2023

Serving You Beyond the Product

Improve your instrument uptime and have peace of mind with our basket of service solutions. We take the load off your shoulders by simplifying your ordering and budgeting processes for various services over the full lifetime of your instruments.

Your needs, our solutions

You concentrate on your research and routine work while we take care of your device - even beyond the product. Keep up to date with new trends, methods, and technologies with our training and application support.

- > Precise and accurate: calibration services
- > Perfect working order: repair services
- > Beyond the product: applications, trainings, and webinars

For more details, visit www.eppendorf.com/epServices

Longevity

Instrument reliability is essential for the daily operation of your lab. Extend the life of your equipment with regular maintenance, high quality parts and expert engineers.

Reward Yourself

Being rewarded has never been easier

Register your product for endless benefits. Get an additional three month warranty on centrifuges, shakers, incubators and cyclers.

Register your product for even more benefits*;

- > Up to 100 epPoints® towards a gift of your choice discount on your next eShop purchase
- > Additional three months' warranty on special devices
